CMYK Intensity Level Representation Test

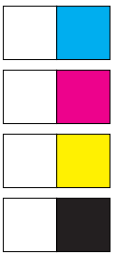
This test page (designed for ghostscript's pcl3 driver) is intended for visually inspecting the representation of equally-spaced intensity levels.

Configuration for this test run

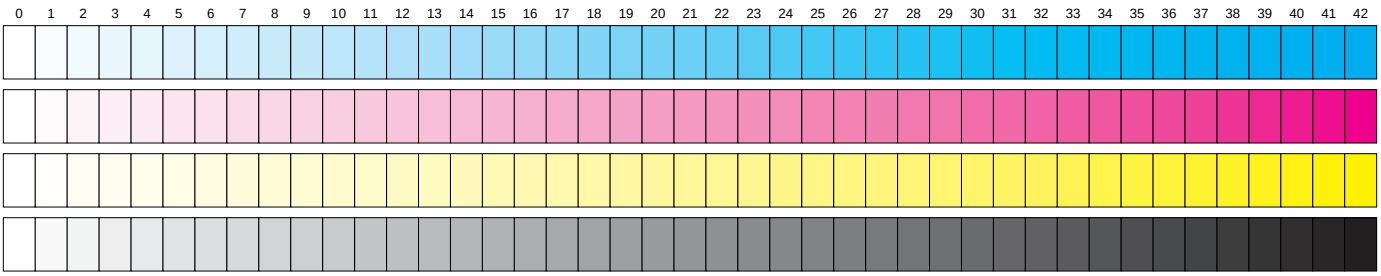
Product:	GPL Ghostscript (revision 10071)	Halftone type: 1
Interpreter version:	3010	Frequency: 106.0 cells/inch
OutputDevice:	pdfwrite	
ProcessColorModel:	DeviceRGB	
Resolution:	720.0 x 720.0 pixels per inch	

This test run uses trivial transfer functions (no gamma correction).

Test with 2 levels



Test with 43 levels



Test with 401 levels
